

## 5120 Display Cleaner

|                           |  |
|---------------------------|--|
| <b>Description</b>        | The display cleaner is suitable for the simple cleaning of displays, e.g. on laptops, tablets or cell phones. With the help of the special formulation and its microphysical effect, dirt is infiltrated and removed from the surface. Particularly suitable for removing fingerprints, stains, dust and greasy residues. Can also be used as an everyday cleaner for sensitive smooth surfaces such as plastics, metal and glass. With the special foam bottle ideal for quick use on the go without water. |
| <b>Advantages</b>         | Material friendly - streak-free cleaning - gentle to the skin  |
| <b>Application fields</b> | Household, industry, electronics   |
| <b>Application</b>        | <p>1. Dispense the display cleaner foam without previous shaking onto the surface by applying it overhead 2. Do not use water - this stops the special effect of the cleaning solution 3. Then wipe the surface with a clean cloth.</p> <p>Note: Test the product on an inconspicuous area. Due to the variety of materials, incompatibilities can never be completely ruled out.</p>  |

### Technical data

|                                |                              |
|--------------------------------|------------------------------|
| <b>Chemical base</b>           | Water with added surfactants |
| <b>Colour</b>                  | Transparent                  |
| <b>Density</b>                 | 1,00 g/ml (20°C)             |
| <b>pH-value</b>                | 5,5 (skin neutral)           |
| <b>Fragrance</b>               | Neutral                      |
| <b>Special features</b>        | biologically degradable      |
| <b>Propellant</b>              | -                            |
| <b>Application temperature</b> | 15°C - 25°C                  |
| <b>Storage temperature</b>     | 10°C - 25°C                  |
| <b>Shelf life</b>              | 24 months                    |
