

5151 Solar cleaner

Description	Efficient and environmentally friendly solution for the direct cleaning of balcony power plants, mobile home solar and mobile or foldable solar modules. Even minor dirt can quickly affect the yield of your solar modules. Cleaning with high-pressure cleaners or a garden hose can both damage the modules and, in the case of balcony power plants, cause problems with the neighbors. Our solar cleaner enables thorough and streak-free cleaning without using large amounts of water or environmentally harmful cleaning agents. Harmless to plastic, glass, rubber or aluminum frames. In addition, it is label-free and ecologically harmless. So no special chemical storage is required and shipping is also possible without any problems.
Advantages	Especially for balcony power plants, mobile home solar and foldable solar modules - no stripes when drying - no labeling required
Application fields	Household, industry
Application	Spray plenty of solar cleaner onto the solar modules and leave to take effect. Then wipe up the loosened dirt with a soft cloth. In the case of heavy soiling such as moss or large areas of bird droppings, pre-cleaning with water is recommended.

Technical data

Chemical base	Water with added surfactants
Colour	Light green
Density	1,00 g/ml (20°C)
pH-value	7,5
Special features	Biodegradable free from phosphate, EDTA and NTA free from acids does not contain alcohols or hydrocarbons
-	-
Propellant	-
Application temperature	5°C - 25°C
Storage temperature	5°C - 35°C
Shelf life	36 months
Packaging	500 ml trigger bottle 1 L trigger bottle
Product variants	A515150001 500 ml trigger A515110101 1 L trigger A515110501 5 L
